**CABLE SUPPORT PRESENTATION**

**June 27th | Eemshaven**

# Cable Support & Storage Eemshaven

The Eemshaven is strategically located for many Offshore Wind related activities. Specialties are also created by sharing knowledge and skills. We want to present our support services especially for those companies that are involved in spooling and storing of cables in any way.

This will be an exciting day with presentations by **Groningen Seaports**, a cruise through the port and we will take a look at the **Sealane Terminal** with **Iskes Towage & Salvage**. We will also visit the **HICE** production location by bus. If you are a professional in cable spooling and / or responsible for storing cable, register now and join us on 27th June 2019 at The Eemshaven. This invitation is personal and the event is free of charge. Do you know anyone who should not miss out on this event? Please send us their details, so we can invite them.
